

Mustang[®]

**Replacement
Seats for
Harley-Davidson[®]**

2009

Why Choose Mustang®?

Al Simmons, President

Mustang prides itself in making the highest quality, most comfortable replacement motorcycle seats available. Every Mustang seat is made in the U.S.A.

Since the company was started in 1980, Mustang has employed true craftsmen who take pride in transforming raw materials to a finished product, all under one roof in their New England facility.

Al Simmons is president and founder of Mustang. He began working in the motorcycle industry in 1971, selling motorcycle seats and accessories. He has traveled to every state and talked to thousands of riders. This, in addition to his own riding experience, as well as a degree in Mechanical Engineering, form the basis of his understanding of the essentials of seat design.

What Is Mustang's Seat Warranty?

All Mustang seats and accessories have a **one-year warranty** against defects in material and workmanship. Every seat is permanently labeled with a serial number, a one-year warranty and our toll free telephone number. Your warranty is automatically activated on date of purchase. If a product appears to be defective, call Mustang to obtain a Return Merchandise Authorization form (RMA). All returns must be carefully packed to avoid shipping damage; you are responsible for return shipping charges. Mustang will, at their discretion, repair or replace the defective portion of the seat or accessory and return it to you freight paid. Incidental or consequential damages or labor charges arising from or in connection with installation or use of a Mustang product are not covered by this warranty.

Where Can I Find Mustang Seats?

Mustang motorcycle seats are sold worldwide through franchised motorcycle dealers and established accessory shops that have retail store fronts and regular business hours. If you need assistance in buying a Mustang seat, please call us toll free and we will be happy to help you.

How Do I Contact Mustang?

We welcome your questions and comments. We read every piece of correspondence. Our regular business hours are *Monday - Friday 9:00 to 17:00h*.

Seat Styles & Descriptions

Variations of styles and descriptions are available depending on the make and model. Some seats have a two-piece look but are built on a single baseplate.

DayTripper™

Mustang's detailed stitch work and advanced comfort technology lets you ride low, look cool and still be comfortable. Never before has such a low and lean seat been available that feels this good for both the rider and passenger. Also available as a separate solo and rear seat.

Studded Style

Traditional style, modern comfort.

All Studded seats feature a skirt with braided edge trim, chrome studs and leather tied conchos. Available in original or Wide Touring versions.

Vintage Style

The same specifications as the Studded style with the braided edge skirt but no studs, conchos or fringe.

Driver Backrest Solos & Kits

Sport Touring Style

The comfort of a Touring seat with a sporty, stylish look available with or without studs.

The ultimate in comfort and versatility, the driver backrest is fully adjustable and removes easily without tools. Available with or without studs and conchos. Complete driver backrest kits are available for most FL Ultra seats.

Custom Squareback™

A sharply contoured design with sewn-in center panels but no buttons or unnecessary stitch work to clutter the clean look.

Regal Style

Soft pillow comfort with just enough folds and pleats to allow the cover full freedom to flex and conform. Tufted with covered buttons, the Regal style is offered in several seat versions.

Fastback™ Style

Cut low to the ground with enough molded foam to be comfortable. The tapered rear section flows smoothly to the fender, yet has adequate padding for use as a passenger seat.

Cobra Style

This lean, low look provides a clean profile while maintaining comfort through molded, controlled density polyurethane foam.

What Makes Mustang America's Choice for Motorcycle Seats?

Mustang's president, Al Simmons, insists that not only must every Mustang seat be good enough to go on an employee's own motorcycle, each must be show bike quality! Mustang believes that, with a well-designed seat, there is no reason to be uncomfortable. You should always enjoy your ride—whether five miles or all day. Mustang seats are meticulously designed so that the baseplate, foam and cover components combine to make the finest, most comfortable seat possible.

Baseplate: *All baseplates are designed and manufactured at the Mustang plant in New England.*

Formed 16 gauge steel baseplates are black epoxy powder coated on both sides for complete rust proofing. Carpet protects fender paint.

Exposed brackets are bright chrome plated.

FLHT/FLHR Ultra and 2006-08 Dyna and 200mm wide tire Softail baseplates are made of 3/16" thick, marine-grade fiberglass, finished in high gloss gel coat.

The edges of all baseplates have a steel reinforced, impact absorbing vinyl edge trim to protect the seat cover.

Polyurethane bumpers are strategically located and riveted to the baseplate to prevent it from touching the frame and fender and to minimize vibration.

Mustang's unique internal steel support wings are added to the baseplate to provide maximum passenger comfort. These wings support the entire width of the molded foam. This feature is found on most Mustang touring seats.

See page 10 for Mustang's Thumb Screw Kit

Foam: *All foam is compounded and molded at our New England facility.*

✓ Controlled density polyurethane foam provides all-day comfort. Mustang seats are known for retaining their shape and support after years of use.

✓ The exact shape, angle and density of each seat foam is formulated and cast to be soft enough for comfort and resilient enough to stand up to those "thousand mile" days.

Cover: *All covers are designed, cut and sewn at our New England facility.*

Covers are made of the highest quality expanded vinyl available. They have the appearance of leather but the durability and resistance to the elements that exceed original equipment standards for motorcycle seats. All seams are sewn twice for strength. The bottom edge that holds the cover to the baseplate is hemmed where the rivets hold the cover to the baseplate.

The edges of our seat skirts are finished with braid. Decorative studs are chrome-plated brass, not steel, and will never rust. Conchos are custom, heavy die-cast zinc (not a thin stamping) and are hand tied with genuine leather straps. Our fringe is vat dyed leather so that the color goes all the way through.

Regal styles are tufted with covered buttons which are double tied with four cords, not two. Mustang seats do not lose their buttons.

Visit mustangeurope.com for baseplate features and mounting suggestions for your make and model or our Frequently Asked Questions (FAQ) section for information on construction, care and maintenance.

Built-In, Removable Driver Backrest

The more you ride, the more you realize that “the most comfortable seat possible” means comfort for your back as well as for your bottom. Whether sitting in your living room, car or on your motorcycle, your back deserves the best support possible. Mustang’s fully adjustable driver backrest is the answer to your riding comfort—whether cross-town or cross-country!

For More Info
mustangeurope.com
+(32)3 541 91 33

Designed and Manufactured to the Highest Standards

Studs are on the back, not on the top where you can catch them with your boot.

Driver backrest pad is contoured to your back.

All exposed hardware is chrome-plated for a custom look.

Foam surrounds the hardware to provide maximum comfort.

Nylon friction washers and stop nuts keep the mechanism tight with smooth operation.

Chrome steel backrest post slides in and out of a receptacle that is reinforced and welded directly into the base-plate for strength.

Ball-end, spring loaded detent screw is set at the factory to ensure positive height adjustment stops.

Built-In, Removable Driver Backrest

- **Most Adjustable**
- **Most Comfortable**
- **No Tools Required**

Pivots with Your Back

The contoured pad pivots to match back angle.

Folds Flat

The backrest folds completely flat for ease of getting on your motorcycle.

Adjustable Height

The backrest post is notched allowing four easy "snap-in-place" height adjustment positions.

No Tools Needed

Backrest is easily removed or replaced without any tools or the need to remove the seat.

Adjust Forward or Back

The chromed, knurled thumbscrew easily adjusts the tilt angle of the backrest forward or back up to 2" while you are seated. Thumbscrew is notched and will not fall out.

Finished Look

When backrest is not in use, the receptacle slot is covered by a leather flap held tightly with a Velcro® closure for a smooth, clean appearance.

SISSY BAR PADS

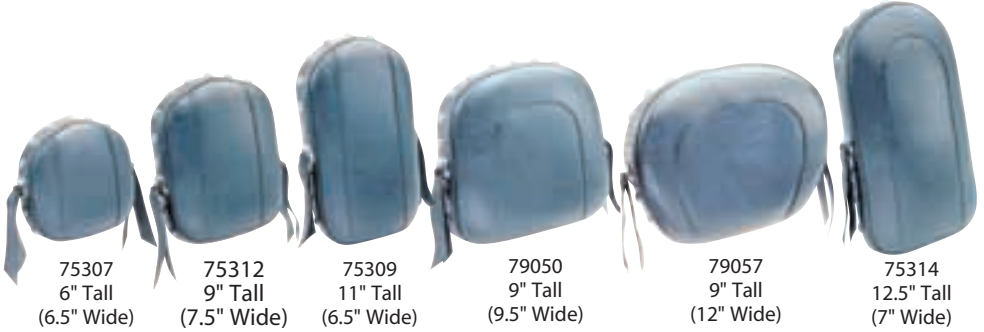

Pads will fit all Harley-Davidson® and aftermarket bars with welded insert plates or with no center insert at all. *Pads do not fit Road King and FLHT sissy bars or bars with die-cast, bolt-in inserts.*

A perfect match to a new Mustang seat, all pads have carpeted backs, chrome brackets and screws. All pads feature two chrome straps but only 9" tall pads (shown) have a threaded center hole for blind mounting plus the optional top bracket.

SISSY BAR PADS

SETBACK SISSY BAR PADS

Unique Mustang Design Gives Passenger More Room!

Only Mustang offers a Setback sissy bar pad with the same appearance and the same thickness as a standard sissy bar pad as well as the same back support and comfort.

Mounting

Pads only fit Harley-Davidson® Medallion style bar (shown). Bars sold through dealers and accessory shops.

Mustang's Setback pad is recessed to lock right around the medallion style sissy bar. No lower bracket is required. It secures with one center screw.

Setback design gives 1" more room for the passenger with same back support and comfort as a standard pad.

Rain Covers

Keep your bike's seat protected and your own seat dry! Mustang's water repellent rain covers fit over all Mustang seats and most stock and aftermarket seats. These black nylon covers go on/off quickly plus conveniently fold up into their own integrated storage pouch with a drawstring. Pouch easily fits in your saddlebag. Choice of standard cover or cover to fit seats with a driver backrest.

- 77598** Rain Cover, Standard Seats (shown)
- 77599** Rain Cover, Seats with Driver Backrests

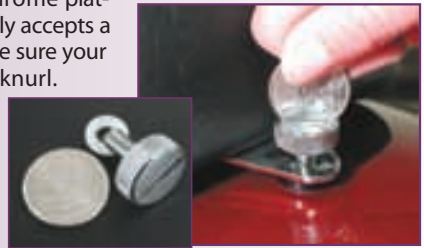

HARDWARE

Quarter Turn™ Thumb Screw

Chrome one-piece steel seat screw is brightly chrome plated and features a wide, deep radiused slot that easily accepts a quarter or a flat bladed screwdriver so you can make sure your seat is secure. The edge features a raised diamond knurl.

Available in two thread sizes to fit all H-D® applications. The screw is 1/8" longer for easier seat installation with saddlebags and luggage racks. Includes nylon washer, but not a quarter!

- 78044** - 1/4 - 28, thru 1995
- 78043** - 1/4 - 20, 1996-09

Fender/Seat Nut Kit

If fender has a plastic plug rather than a nut insert, remove plug and use nut kit to mount solo or rear seat.

- 78084** - Fender/Seat Nut Kit

Studs Chrome Studs

12.5mm (1/2") diameter
Decorative studs are chrome-plated brass, not steel, and will never rust.

- 78079** - Bag of 20 Studs

Black Pearl-Centered Chrome Studs

Same specifications as chrome studs but with black pearl centers.

- 78089** - Bag of 10 Studs

TANK BIBS

Tank Bibs are available plain or with studs and a concho. Contoured to hug the tank and felt-backed to protect the paint. The edges are finished with braid. Decorative studs are plated brass, not steel, and won't rust. Conchos are heavy die cast zinc and are hand-tied with genuine leather straps.

Mini Fender Bibs

The perfect bib for showing the rear fender but hiding the stock solo washers. Fits Road King 1994-up and following models that have a stud plate: Softail Heritage Springer, Deluxe, Springer and Heritage Classic.

78064 - Mini Fender Bibs

SPORTSTER 2004-09 (pages 12-17)

Baseplate Features

2004-09 Sportster seats have marine-grade fiberglass baseplates. Baseplates feature elastic polyurethane rubber bumpers to protect the motorcycle and soften vibrations.

One-Piece Baseplate

The chrome rear tab on the back of the seat aligns with the threaded fender hole.

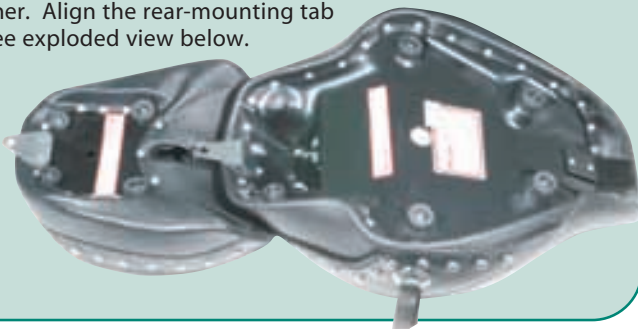

Two-Piece Baseplate

Solos are mounted with a single fender screw and engage at the nose. When mounting the rear seat, align spool washer on top of the solo bracket and bolt down to the fender with the supplied bolt. The front of the rear seat is slotted and engages into the spool washer. Align the rear-mounting tab to the fender and secure. See exploded view below.

Quick-Detachable Passenger Seat System

Exploded view for clarity.

Regal Duke

These popular regal pillow seats feature a split foam construction on a single baseplate. This maximizes the driver back support and keeps the passenger from sliding forward.

SPORTSTER 1958-03 (pages 18-25)

Baseplate Features

All 1958-03 Sportster seats have a steel baseplate that is black powder coated. Baseplates feature elastic polyurethane rubber bumpers to protect the motorcycle and soften vibrations as well as carpet to protect the fender. See page 10 for hardware.

1958-78 XL, XLCH, XLH and K models.

The baseplate has a deep nose pocket with two nose tab mounting locations to fit either the short or long electric start frame. The rear of the seat is held down with a single bolt up through the stock fender slot. A chrome rear tab can be added.

**1979-1981 XL, XLH and XLS models.****1982-1995 883,1000 and 1200 XL models.**

Nose tab is located 1" further back than that of the 1979-81 baseplate.

**1996-2003 XL and all models with a 3.3 gallon tank.**

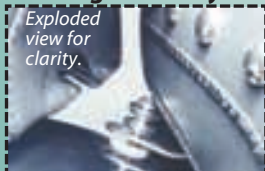

The nose of the baseplate is shortened to allow room for 3.3 gallon tank. Will also fit 1983-85 XLS Roadster models.

Ride low and look cool and still be comfortable at the end of the day's ride. Never before has such a low and lean seat been available that feels this good for both the rider and passenger.

76397 - 1996-03 & all 3.3 gal.

Front Width - 12"
Rear Width - 7"

SPORTSTER 1982-03

Solo & Rear
Seat Combinations

Mix and match the solos and rear seats. Choose your solo, then pick a Thin or Standard rear seat. Solos and passenger seats will also work with those on page 24. For solo riding, use a matching fender bib (see page 11). Solos have a chrome rear tab. Rear seats have a chrome rear tab and are slotted in front to slide over the solo's mounting screw. Rear seat bases are carpeted.

Thin Rear Seat

Provides a clean profile while maintaining comfort through molded high-density polyurethane foam.

75482 - 1982-03

Rear Seat

Width - 6"

Standard
Rear Seat

More padding for passenger comfort and better driver back support. Features chrome studs.

75491 - 1982-03 Rear Seat

Width - 8"

SPORTSTER 1958-03

Sport Touring Seats

Contoured wings inside the wide molded foam shapes are welded directly to the steel baseplate, effectively doubling the lateral support the seat can offer. Logically, if you put an 11" wide foam on a 6" wide fender shape, after an hour of riding in the hot sun, all the passenger will feel is the narrow 6 inches. Mustang seats support the full width of the rider and passenger buckets. Yet outwardly, these Touring seats still exactly match the lines of the frame and fender, keeping a low profile. No other seat comes close to matching the comfort of a Mustang seat on a Sportster.

Wide Studded Sport Touring

Features chrome studs all around. The front bucket has a full skirt with braided edge trim and leather tied conchos.

75507 - 1982-95

75493 - 1996-03 & all 3.3 gal.

Front Width - 14"

Rear Width - 11"

FX/FL BIG TWIN 1958-84 (pages 26-31)

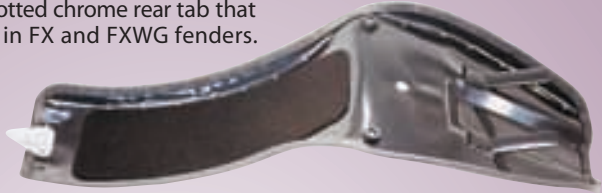

Baseplate Features

Mustang FX and FL seats fit all Big Twin models from 1958-86 except FXR and FLT. The 16 gauge steel baseplates are formed to wrap down and over the frame and fender. All steel baseplates are black powder coated, carpeted and have rubber bumpers to prevent them from touching the frame or fender. See page 10 for hardware.

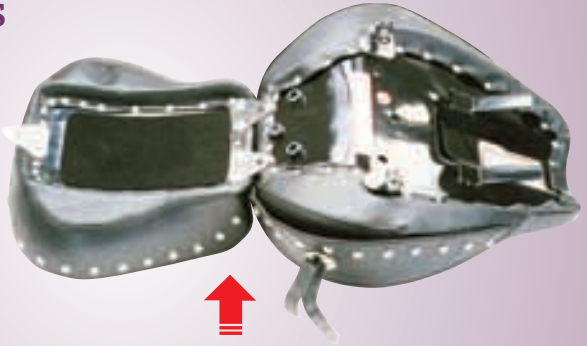

FX/FL 1958-84

The mounts on all 1958-84 seats feature two welded steel nose brackets and a slotted chrome rear tab that aligns with the threaded hole in FX and FXWG fenders.

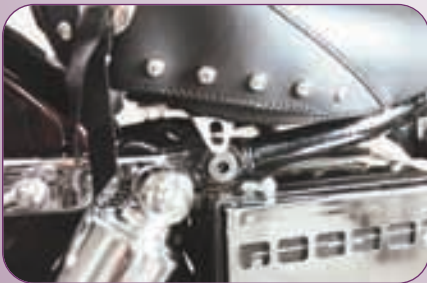

FX/FL Big Twins 1965-84 Solos & Rear Seats

Mix and match Mustang FX solo seats and rear seats. Solos mount directly to the frame without drilling any holes. Unique mounting system combines slotted chrome side brackets and special rubber expansion plugs with threaded inserts.

Mustang rear seats have two chrome tabs that align with mounting holes in the back of the solo. Chrome rear tab matches stock fender hole.

Put the plugs into the frame cross tube, drop the solo over them, tighten the bolts.

One-Piece Baseplate Features

FXR

Mustang one-piece FXR seats can be used on any model FXR. The formed steel baseplate has both a nose tongue as well as mounts for stock hinges and latches. A chrome rear tab secures to the fender with a stock screw. The advantage of the one-piece design is that the passenger seat on certain seat styles now extends forward to support the driver's lower back without interfering with hinging. Once the rear screw is removed, either the whole seat can be unlatched and hinged up or, if using just the nose mount, simply lifted off. Rubber bumpers help isolate vibration and carpeted base protects the fender. See page 10 for hardware.

One-Piece Baseplate

Seat Nose Bracket

Steel bracket mounts to rear mounting holes on the gas tank of FXR models when converting from hinged two-piece seats to a one-piece seat.

75080 - FXR Nose Bracket \$4

Two-Piece Baseplate Features

Mustang two-piece FXR seats are designed to fit all 1982-94 models with hinged front seats. Two-piece seats may be used on 1999 and 2000 models if a hinge and latch kit is purchased. The formed steel baseplates of the solo and rear seat have rubber bumpers to protect the paint. Use the OEM hinge and latch on new solo seat. Passenger seat has a chrome rear bracket and front slots in the base to fit directly to the fender bolts. No spacers are needed.

Two-Piece Baseplate

Chrome Seat Bolts

Mustang offers these chrome seat bolts which replace the stock bolts that mount the front of the passenger seat in place. This system allows for quick removal of rear seats.

78027 - Chrome Seat Bolts
\$8 pair

Baseplate Features

Mustang Dyna Glide/Wide Glide seats fit all FXD and FXDWG models 1991-09. See page 10 for hardware.

DYNA

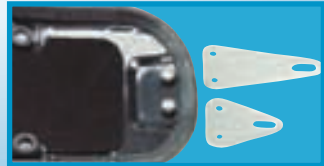

Solo & Rear Seat Baseplates 1991-95

Mustang solos have a single chrome tab that aligns with the fender hole. If the solo and rear seat are assembled, the seat is mounted with just the chrome rear fender tab.

1991-95 Baseplates

Two brackets are supplied for both one and two piece baseplates: a long bracket for Dyna Wide Glide models and a short bracket for Dyna Glide models that simply bolt to the rear of the seat.

One-Piece Baseplate 1996-05

All one-piece baseplates have two sets of holes for the supplied chrome bracket to bolt into. The first set of holes closest to the rear of the seat is for all Dyna Wide Glide models and the second set of holes is for all Dyna Glide models.

Original Studded Seat

Mustang's Studded seat has all the features to make it our most popular seat. A full front bucket for the rider, trimmed with a braided edge skirt that comes down over the frame and fender for a clean, uninterrupted look. Passenger seat angles forward to support the rider's back. Two-piece foam on a single-piece steel base that quickly bolts on using stock locations. Trimmed with chrome studs, conchos tied with leather and sewn-in center panels. New technology adds long distance comfort to the "old" look.

Sport Touring Two-Piece Seats

Mustang's Sport Touring seats offer riders and passengers the comfort of a touring seat with a sporty, stylish look. The **14" wide solo** angles back to hold the driver into the pocket and keep him from sliding forward, with more than an inch of increased leg room. Passenger seats are available in 9" or 12" widths and are thicker than stock. Mustang recommends using the improved sissy bar pad for best fit. The 12" rear seat is supported by internal steel support wings to hold up the full width of the foam. Mustang solos and rear seats can not be mounted alone and will not fit with Harley solos and rear seats.

Baseplate Features

Solos and rear seats are built on a black, gel coated, 3/16" thick marine-grade fiberglass baseplate. Solo comes complete with hinge and utilizes stock key latch mechanism. Rear seats mount like stock.

75885 - Two-Piece
Rear Width - 12"

Contoured Sissy Bar Pad 10.5"w x 9"h

Pad is 2" taller than stock for more back support. Lower portion is tapered for increased seating area. Fits stock sissy bar.

75709

Sport Touring With Driver Backrest, Two-Piece Seats

Sold as a complete three-piece set including solo, removable driver backrest and matching passenger seat. **The driver backrest mechanism is built directly into the passenger seat--not into the solo.** The built-in driver backrest offers more features than any other backrest on the market.

79335 - Two-Piece Seat with Driver Backrest
Rear Width - 12"

SOFTAIL Wide Tire 2006-09 (pages 47-57)

Softail 200mm wide tire fit FXST 2006-09,
FLSTF Fat Boy 2007-09 & FLSTSB Cross Bones* 2008-09
For all other Softail models see pages 58-77.

* Note: Fitment on FLSTSB Cross Bones requires removal of stock springs and plastic cover.

Baseplate Features

Softail baseplates are direct replacements for the stock seat. Rubber bumpers are positioned to protect the frame and fender.

2006-09 One-Piece Baseplate

The chrome rear tab on the back of the seat aligns with the threaded fender hole.

2006-09

Solo & Rear Seat Baseplates 2006-09

Mustang solos have a single chrome tab that aligns with the fender hole. When mounting the passenger seat, align supplied spool washer on top of the solo bracket and bolt down to the fender with the supplied bolt. The front of the passenger seat is slotted and engages into the spool washer. Align the rear mounting tab to the fender and secure.

For all Softail 2006-09 wide rear tire models see pages 47-57.

Baseplate Features

Mustang Softail seats will NOT fit 1999-earlier FLSTS Heritage Springers.

All seats are built on 16 gauge formed steel baseplates. A welded nose tab clips into the frame mount behind the gas tank. The baseplates have rubber supports at contact points and carpet to protect the fender. See page 10 for hardware.

2000-06 One-Piece Baseplate

All 2000-06 models require the stock rear mounting bracket be removed from the stock seat and bolted to the Mustang seat.

HD# 52467-00 2000-06
Seat Mounting Bracket
(sold through dealers).

1984-99 One-Piece Baseplate

The slotted chrome rear tab on the back of the seat aligns with the threaded fender hole.

1984-06 Two-Piece Baseplates

Solos have two removable side brackets that align with the large threaded holes in all Softail frames. When the solo and rear seat are assembled, the side brackets on the solo can be removed and the seat mounted with just the single rear screw. All rear seats are connected to the solo with two hidden screws.

1984-99 Rear Seat Shown

Chrome Solo Bolts

All 2000-06 Softail solos are shipped complete with chrome side bolts. Bolts will fit all 1984-07 models.

78033 - Softail Solo Bolts **per pair**

Mounting Hardware

If stock bracket is missing from 2000-06 Softail, use bracket #78037.

Tripper™ & DayTripper™

Mustang's advanced comfort technology has been incorporated into this totally new style of custom seat. Now you can ride low and look cool and still be comfortable at the end of the day's ride. The detailed stitch work in the highly durable, synthetic glove-leather cover makes the DayTripper™ and Tripper™ a real show winner. Never before has such a low and lean seat been available that feels this good for both the rider and passenger.

One-Piece Sport Touring Seats

Mustang's Sport Touring seats offer riders and passengers the comfort of a touring seat with a sporty, stylish look. The seat features a **15.5" front bucket** with an **11" wide rear seat**. The seat nose is narrower than stock so that the rider can plant his feet on the ground. The baseplate is open in the middle to accept a Mustang or stock Harley® driver backrest kit. Available plain or with chrome studs.

*Only works with one-piece
Ultra Touring seat. Will not
work with a solo.*

Extended Arm FL Wrap-Around Backrests

Direct mounting to all FLT and FLHT King Tour Packs 1986-07. Rubber washer mounting system eliminates the troublesome soft stock isolators. Arms are extended an extra 2" for added comfort. Thicker foam padding provides comfortable armrests.

Note: Will not fit leather or chopped Tour-Pak.®

Baseplate Features

1965-88 FLH & FLT Sport Touring Baseplate

One-piece Sport Touring seats are constructed on extra rugged, triple layered fiberglass. Adjustable nose bracket is turned forward to fit '80-82 FLT.

(1983-88 FLT Shown)

1983-96 FLT/FLHT Ultra Touring Baseplate

One-piece touring seats are constructed on extra rugged, triple-layered fiberglass. The baseplate is slotted in the middle to allow for the use of a driver backrest.

(1991-96 Baseplate Shown)

1983-96 FLT/FLHT Solo & Rear Seat Baseplates

Solo and rear seat baseplates are constructed of marine-grade fiberglass. Solo seats have two chrome mounting tabs that align with the stock threaded fender mounts.

Rear seat mounts vary by model number; see page 110 for specific mounting. See page 101 for hardware.

(#75558 Solo Shown)

(#75559 Rear Seat Shown)

Note: The 1991-96 Passenger Seats will not fit earlier models because they have no provision for the rear mounting tab.

Driver Backrest Kit

Driver Backrest Kits mount to stock threaded inserts, no drilling required. Receiver is black powder-coated steel. All exposed hardware is chrome plated.

FLT & FLHT 1985-96 Ultra Touring Seats

Ultra comfortable touring seat for FL models. Sporty enough for the FLHS and elegant enough for the FLHTC. Supported foam eliminates that "dumped forward" feeling. Seat nose extension looks like a custom panel. Front bucket has a full skirt with braided edge. Available plain or studded with leather tied conchos and chrome studs. One-piece baseplate is split in the middle for a driver backrest. Features a chrome rear tab or threaded side mounts.

Mounting System For FL

Pads have two cup washers that mount to the backrest loop on 4-channel luggage racks and frame mounted handrails. Luggage racks and handrails are sold through dealers and accessory shops.

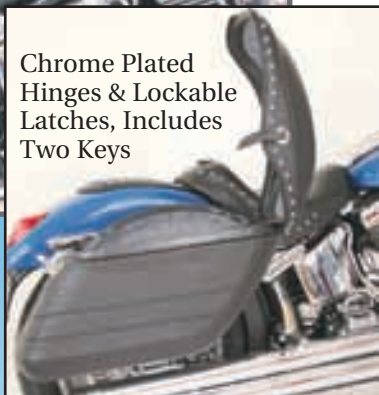

Hard Saddlebags

Also available Plain,
No Studs or
Conchos

Chrome Plated
Hinges & Lockable
Latches, Includes
Two Keys

A truly unique look in hard saddlebags!

Mustang's unique skirted lids features braided edge trim, studs and conchos, as well as classic braided accents on the bags that evoke a nostalgic look. These flat-backed bags with recessed front corners for axle clearance are made of reinforced fiberglass and covered with our high quality expanded vinyl.

Bags and lids feature a rubber seal to help make the bags ultra water resistant. The inside surface is lined with a durable felt-like material that is easy on the contents as well as the knuckles. Mustang Saddlebags are undrilled for a universal fit that will clear most exhaust systems. Mounting hardware is not included; see below. **Turn signal relocation may be required on some models.**

Bags measure 26" long x 15" high x 9" wide with a 21" x 9" opening. Overall capacity is 1,960 cubic inches per pair (17 quarts each). Holds half-helmets.

13300 Studded with conchos (shown) **per set**

13301 No Studs or conchos **per set**

PROTECT ALL™

Cleans, Polishes, Waxes & Treats

All Mustang seats are treated with Protect All™ before shipping. Protect All™ is a do-it-all cleaner that cleans, polishes, waxes, treats and protects all surfaces and leaves no oily film. Protect All's™ water repellent carnauba wax formula provides durable protection against all elements. Simply spray, wipe, and polish dry for a durable, lasting shine. To keep your seat clean and the stitching water repellent, Mustang recommends the occasional use of Protect All™ or a similar spray carnauba wax.
