## Why Choose Mustang?

Mustang prides itself in making the highest quality, most comfortable replacement motorcycle seats available. Every Mustang seat is made in the U.S.A.

Since the company was started in 1980, Mustang has employed true craftsmen who take pride in transforming raw materials to a finished product, all under one roof in their New England facility.

Al Simmons is president and founder of Mustang. He began working in the motorcycle industry in 1971, selling motorcycle seats and accessories. He has traveled to every state and talked to thousands of riders. This, in addition to his own riding experience, as well as a degree in Mechanical Engineering, form the basis of his understanding of the essentials of seat design.

### What Is Mustang's Seat Warranty?

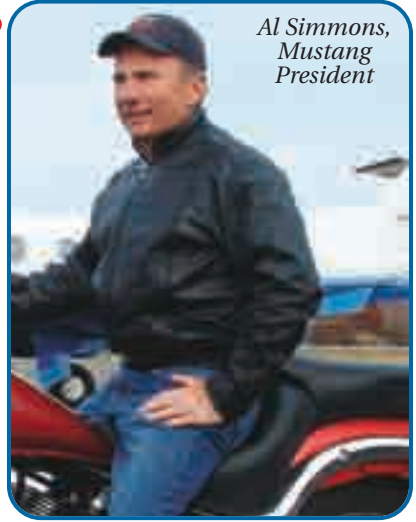

All Mustang seats and accessories have a one-year warranty against defects in material and workmanship. Every seat is permanently labeled with a serial number, a one-year warranty and our toll free telephone number. Your warranty is automatically activated on date of purchase. If a product appears to be defective, call Mustang to obtain a Return Merchandise Authorization form (RMA). All returns must be carefully packed to avoid shipping damage; you are responsible for return shipping charges. Mustang will, at their discretion, repair or replace the defective portion of the seat or accessory and return it to you freight paid. Incidental or consequential damages or labor charges arising from or in connection with installation or use of a Mustang product are not covered by this warranty.

### Where Can I Buy Mustang Seats?

Mustang motorcycle seats are sold worldwide through franchised motorcycle dealers and established accessory shops that have retail store fronts and regular business hours. If you need assistance in buying a Mustang seat, please visit our website or call us toll free and we will be happy to help you.

### How Can I Contact Mustang?

We welcome your questions and comments. We read every piece of correspondence. (Some of our customers' comments are included throughout this catalog.) Our regular business hours are *Monday - Friday, 9:00 to 17:00.*

Al Simmons,  
Mustang  
President

# Seat Styles & Descriptions

Variations of styles and descriptions are available depending on the motorcycle make and model. Some seats have a two-piece look but are built on a single baseplate.

## DAYTRIPPER®

Mustang's detailed stitch work and advanced comfort technology is incorporated into this totally new style of custom seat. Ride low, look cool and still be comfortable. Never before has such a low and lean seat been available that feels this good for both the rider and passenger.

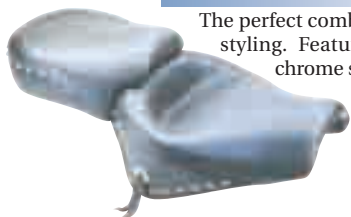

## SPORT TOURING STYLE

The comfort of a touring seat with a sporty, stylish look.

## WIDE STUDDED STYLE

The perfect combination of comfort and traditional styling. Features a skirt with braided edge trim, chrome studs, and leather tied conchos.

## WIDE VINTAGE STYLE

The same specifications of the Wide Studded style with the braided edge skirt but no studs or conchos.

## DRIVER BACKREST TOURING STYLES

The ultimate in comfort and versatility, the driver backrest is fully adjustable and easily removable without tools. Available with or without studs and conchos.

## WIDE REGAL STYLE

A soft pillow top tufted with covered buttons highlight this touring seat.

## REGAL DUKE™

A streamlined version of the Wide Regal style. Split construction keeps the passenger from sliding forward.

## SQUAREBACK™

The Squareback™ is a sharply contoured design. The cover has sewn-in center panels but no buttons or unnecessary stitch work to clutter its clean look.

## FASTBACK™

Cut low to the ground with enough molded foam to be comfortable. The tapered rear section flows smoothly to the fender, yet has adequate padding to be used as a passenger seat.

## What Makes Mustang America's Choice for Motorcycle Seats?

Mustang's president, Al Simmons, insists that not only must every Mustang seat be good enough to go on an employee's own motorcycle, each must be show bike quality! All components are hand assembled to give you a quality finished product because, with a well-designed seat, there is no reason to be uncomfortable. You should always enjoy your ride--whether five miles or all day. Mustang seats are meticulously designed so that the baseplate, foam and cover components combine to make the finest, most comfortable seat possible.

**Baseplate:** *All baseplates are designed and manufactured at our New England facility.*

The baseplate is made of marine-grade fiberglass, 3/16" thick, finished in high gloss gel coat.

All brackets are riveted in place. Exposed brackets are bright chrome plated.

Hidden brackets have a tough, black epoxy powder coat finish.

The edges of all baseplates have a steel reinforced, impact absorbing vinyl edge trim to protect the seat cover.

Polyurethane rubber bumpers are strategically located and riveted to the baseplate to prevent it from touching the frame and fender and to minimize vibration. Bumpers will not crack with age and are ozone protected.

- ✓ Mustang's unique internal steel support wings are added to the baseplate to provide maximum passenger comfort. These wings support the entire width of the molded foam. This feature is found on most Mustang touring seats.

**Foam:** *All foam is compounded and molded at our New England facility.*

- ✓ Controlled density polyurethane foam provides all-day comfort. Mustang seats are known for retaining their shape and support after years of use.
- ✓ The exact shape, angle and density of each seat foam is formulated and cast to be soft enough for comfort and resilient enough to stand up to those "thousand mile" days.

**Cover:** *All covers are designed, cut and sewn at our New England facility.*

Covers are made of the highest quality expanded vinyl available. They have the appearance of leather but the durability and resistance to the elements that exceed original equipment standards for motorcycle seats. All seams are sewn twice for strength. The bottom edge is hemmed where the rivets hold the cover to the baseplate.

The edges of our studded seat skirts are finished with braid. Decorative studs are plated brass, not steel, and will never rust. Conchos are custom, heavy die cast zinc, not a thin stamping and are hand-tied with genuine leather straps. Our fringe is vat dyed leather so that the color goes all the way through.

Regal styles are tufted with covered buttons which are double tied with four cords, not two. Mustang seats do not lose their buttons.

Visit [mustangeurope.com](http://mustangeurope.com) for baseplate features and mounting suggestions for your make and model or our Frequently Asked Questions (FAQ) section for information on construction, care and maintenance.

# Built-In, Removable Driver Backrest

The more you ride, the more you realize that “the most comfortable seat possible” means comfort for your back as well as for your bottom. Whether sitting in your living room, car or on your motorcycle, your back deserves the best support possible. Mustang's fully adjustable driver backrest is the answer to your riding comfort--whether across town or cross-country!

For More Info  
[mustangeurope.com](http://mustangeurope.com)  
+(32)3 541 91 33

Designed and Manufactured  
to the Highest Standards

Studs are on the back, not on the top where you can catch them with your boot.

All exposed hardware is chrome-plated for a custom look.

Foam surrounds the hardware to provide maximum comfort.

Contoured backrest pad measures approximately 7" high by 12" wide.

Nylon friction washers and stop nuts keep the mechanism tight with smooth operation.

Chrome steel backrest post slides in and out of receptacle that is reinforced and riveted directly into the base-plate for strength.

Ball-end, spring loaded detent screw is set at the factory to ensure positive height adjustment stops.

# Built-In, Removable Driver Backrest

- Most Adjustable
- Most Comfortable
- No Tools Required

## Pivots with Your Back

The contoured pad pivots to match back angle.

## Folds Flat

The backrest folds completely flat for ease of getting on your motorcycle.

## Adjustable Height

The backrest post is notched allowing four easy "snap-in-place" height adjustment positions.

## No Tools Needed

Backrest is easily removed or replaced without any tools or the need to remove the seat.

## Adjust Forward or Back

The chromed, knurled thumbscrew easily adjusts the tilt angle of the backrest forward or back up to 2" while you are seated. Thumbscrew is notched and will not fall out.

## Finished Look

When backrest is not in use, the receptacle's slot is covered by a leather flap held tightly with a Velcro® closure for a smooth, clean appearance.

## TWO-PIECE SEATS

### WIDE TOURING

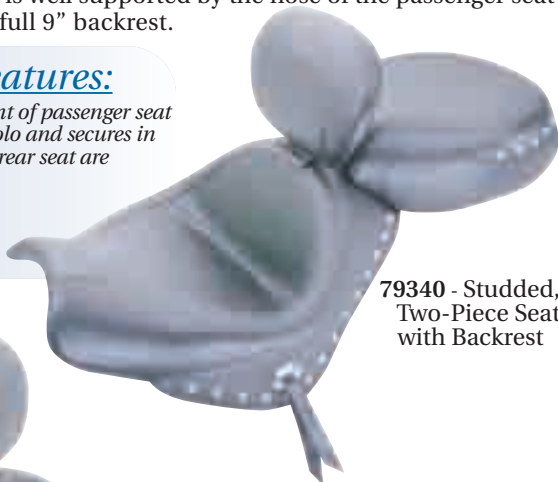

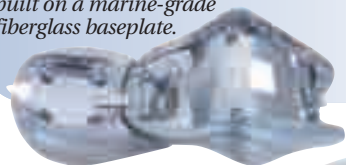

The deeply pocketed 16" wide driver seat sits you at the ideal cruising angle. The 12.5" wide passenger seat utilizes Mustang's unique internal steel support wings. Sold as a complete three-piece set including solo, removable driver backrest, and matching passenger seat. The built-in driver backrest offers more features than any other backrest on the market (pages 6-7). On the styles without the driver's backrest, the driver's back is well supported by the nose of the passenger seat that extends forward to create a full 9" backrest.

HONDA

### Two-Piece Baseplate Features:

*Solo utilizes stock mounting brackets. Front of passenger seat has a bracket that slides into receiver on solo and secures in the rear with an 8mm bolt. Both solo and rear seat are built on a marine-grade fiberglass baseplate.*

## SPORT TOURING

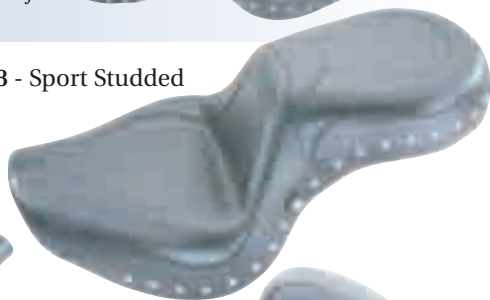

Mustang's Sport Touring seats have a **15" wide driver bucket** that sits you at the ideal cruising angle. The entire 11.5" width of the comfortable passenger seat is fully supported by Mustang's unique internal steel support wings--no sagging on the edges, no more passenger complaints. The built-in driver backrest offers more features than any other backrest on the market (see page 6-7). Seats will not work with low sissy bar.

### Baseplate Features:

*The marine-grade fiberglass baseplate features rubber bumpers to prevent it from touching the frame and fender. Mounts like stock except the stiffer Mustang baseplate eliminates the need for the rear bolt. Stock mounting bolts go through an opening on the side of the seat to secure it to the bike.*

# Comments from our Yamaha Customers

Please visit [mustangeurope.com](http://mustangeurope.com) for more comments and pictures from our Yamaha customers.

## The Best that Money Can Buy

See for yourself: my VN800 Classic looks great, the service was fast and the seat-- what a difference!

I just have to say that these are the best seats that money can buy.

Keep up the good work Mustang, I'm sure you will be hearing from a lot more Aussies in the near future. G-day Mate!

John W., Lemon Tree Passage, NS, Australia

## Bum Saver

Thanks for saving my bum!!! Love my Honda Shadow VLX Deluxe but hate the stock seat. Picked up a Mustang Vintage Wide seat and now my bum is happy plus the bike looks better. Believe me when I say I will tell other riders that Mustang Seats are the only way to go!

Chris J., Orem, Utah

## A Magnificent Addition

My Suzuki C50T is a great bike, with one exception: the stock seat. After one long ride I couldn't take it anymore and decided something had to be done and started researching aftermarket saddles. I was impressed by the testimonials from other Mustang seat owners and ordered one.

When the seat arrived it took me five minutes to install. It is a magnificent addition to my bike. The seat was instantly more comfortable than my stock seat and never became painful through the entire trip. Thank you, Mustang, for a well-made, well-designed and very comfortable seat. I will recommend your product to all my friends who ride.

S. Hanks, Chandler, AZ

## Love at First Sit

I got my seat today and the instant that I sat on it I knew I was going to love it. Then I took it for a test drive.

Your seat is extremely comfortable. The back support is going to be a blessing because I had a back problem some time ago that went away, but I really believe that the stock seat on my Shadow Sabre 1100 would have given me a problem if I had not changed out.

When I got back my wife was waiting and she could not get the words "Oh, I love it" out of her mouth quick enough. She just kept saying it over and over.

Freddy P., Murfreesboro, TN

# YAMAHA

## SISSY BAR PADS

## ONE-PIECE DAYTRIPPER™

Mustang's advanced comfort technology has been incorporated into this new style of custom seat. Ride low, look cool and still be comfortable at the end of the day's ride. The detailed stitch work in the highly durable, synthetic glove-leather cover makes the DayTripper™ a real show winner. Never before has such a low and lean seat been available that feels this good for both the rider and the passenger.

# YAMAHA WILD STAR 1600/1700 '99-09

## TWO-PIECE WIDE TOURING

The deeply pocketed front bucket measures a full 17" across and can be run as a solo. The passenger seat extends forward to provide additional driver back support. Passenger seats are 13" wide and utilize internal steel support wings for all day comfort--your passenger will be happy. Mustang's engineers have designed the Road Star seat to close tolerances for a perfectly tight fit.

YAMAHA

### Two-Piece Baseplate Features:

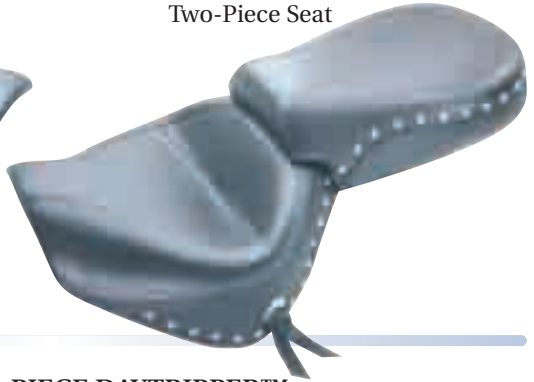

*The passenger seats are attached to the solo with two hidden screws. Mustang has designed the seat for quick removal in that the solo portion utilizes the stock key latch and the rear of the seat is bolted down with the stock rear screw and a supplied nylon washer. To access the helmet locks and tool kit, unlatch seat and pivot a few inches to the right. To check oil or battery pivot left.*

# YAMAHA V-STAR DRAGSTAR 650 1998-09 CUSTOM, CLASSIC & SIL- VERADO ONE-PIECE SEATS

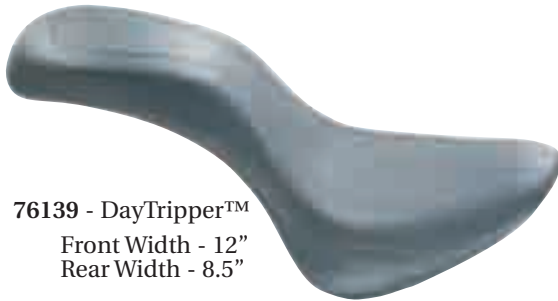

## WIDE TOURING

Mustang's deeply pocketed driver seat is a full 16" wide and sits you at the ideal cruising angle. The driver's back is well supported by the nose of the passenger seat that extends forward to create a full 8.5" backrest. The passenger sits comfortably in a 12.5" wide bucket that utilizes Mustang's unique internal steel support wings to keep the entire width of the molded foam supported.

YAMAHA

### Baseplate Features:

Mustang's one-piece seat is designed to fit both the 650 V-Star Custom and Classic models. The marine-grade fiberglass baseplate features rubber bumpers which are strategically positioned to minimize vibration. The supplied chrome bracket bolts into one of two sets of holes in the seat, depending on the bike model.

76139 - DayTripper™

# YAMAHA VIRAGO

## 700/750/1000/1100 1984-99

### ONE-PIECE SEATS

#### Baseplate Features:

Mustang's one-piece, marine-grade fiberglass baseplate is designed to mount like stock. Powder coated metal brackets align with stock mounting locations. Rubber bumpers are positioned to protect the frame and fender.

YAMAHA

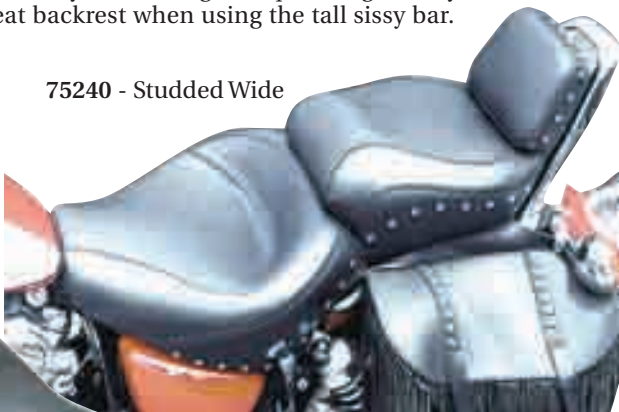

#### WIDE TOURING

Eliminates that "pushed-forward" feeling. The look of a two-piece seat and separate backrest pad are all built on a single baseplate. The deeply pocketed front bucket features a full 15" of lateral support. The 12.5" wide passenger seat extends forward to provide additional driver back support. The 9" wide rear backrest is integrated into the seat. The Virago accessory or Mustang's unique Wedged Sissy Bar Pad fits right above the Mustang seat backrest when using the tall sissy bar.

75244 - Vintage Wide  
No Studs,  
No Conchos

75240 - Studded Wide

#### WIDE REGAL

The soft pillow top is tufted with covered buttons.

75242 - Regal

#### WEDGED SISSY BAR PADS

Provides complete back support and comfort for your passenger. The thickness of the pad increases from 2.25" at the bottom to 3.5" at the top. The unique wedge shape of the pad compensates for the angle of the sissy bar by 5° forward. The bottom of the pad blends with the face of the built-in backrest on the Mustang seat. The 7.5" tall pad is 7.25" at the bottom and 6" wide at the top.

79074 - Studded Pad  
with Conchos

79075 - Regal Pad

79076 - Vintage No Studs,  
No Conchos  
(Not shown)

# SUZUKI VZ800 MARAUDER 1997-04 ONE & TWO-PIECE SEATS

## WIDE TOURING

Mustang offers both a one and a two-piece seat styles with deeply pocketed, 16" wide front buckets and 12.5" passenger seats. The driver's back is well supported by the nose of the passenger seat that extends forward to create a full 7" high backrest. The two-piece version offers the added advantage of using the stock key mechanism and the option of easily converting to a solo.

### One-Piece Baseplate:

Marine-grade fiberglass baseplate is a direct replacement for the stock two-piece seat. All brackets are built directly into the baseplate. The key latch mechanism is not used with the one-piece application. Rubber bumpers are positioned to protect the frame and fender.

### Two-Piece Baseplate:

Marine-grade fiberglass baseplate utilizes stock mounts and allows the use of the stock key latch mechanism. The passenger seat comes complete with chrome mounting hardware that bolts directly to the stock locations. Rubber bumpers are positioned to protect the frame and fender.

# KAWASAKI VULCAN 2000 '04-09 TWO-PIECE SEATS

## DRIVER BACKREST WIDE TOURING SEATS

Mustang's popular touring seat is now available for the Vulcan 2000. The fully pocketed, 17" wide driver seat sits you at the ideal cruising angle. The 12.5" wide passenger seat utilizes Mustang's unique internal steel support wings. All styles feature a skirt with braided edge trim shown without the driver's backrest on page 66. The built-in driver backrest offers more features than any other backrest on the market (see page 6-7). Same baseplate features as described on page 66. The front seat latches using stock mounts; the passenger seat has a front tongue and mounts with the stock fender screw.

Matching tank and fender bibs complete the custom look (pages 79-81).

## TOURING

Mustang's seats feature a 16" wide deeply pocketed driver bucket that sits you at the ideal cruising angle. The entire 13" width of the comfortable rear seat is fully supported by Mustang's unique internal steel wings--no sagging on the edges, no more passenger complaints. Built on a marine-grade fiberglass baseplate, the two-piece seat mounts just like stock. Mustang's touring seat is available with or without a built-in driver backrest and is also sold with studs and conchos. Matching tank and fender bibs are available.

### Baseplate Features:

*The two-piece, marine-grade fiberglass baseplate is a direct replacement for the stock seat. All brackets align with stock mounts for quick installation. Rubber bumpers are positioned to protect the frame and fender.*

## SPORT TOURING

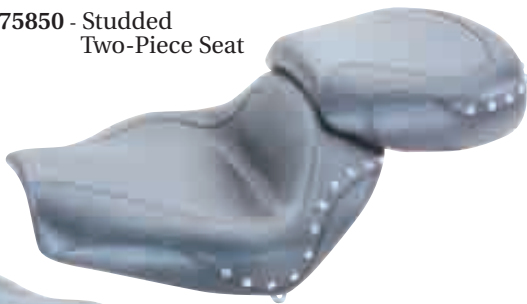

The deeply pocketed 15.5" wide driver seat sits you at the ideal cruising angle. The 11" wide passenger seat utilizes Mustang's unique internal steel support wings. On the styles without the driver's backrest, the driver's back is well supported by the nose of the passenger seat that extends forward to create a full 8" backrest. Features of the built-in driver backrest can be found on pages 6-7.

Baseplate Features:  
*Solo utilizes stock side mounts. Front of passenger seat has a bracket that slides into receiver on solo and rear secures to fender with stock screw. Both solo and rear seat are built on a marine-grade fiberglass baseplate.*

# TANK BIBS

Handmade in New England, Tank Bibs are available plain or with studs and a concho. Contoured to hug the tank and felt-backed to protect the paint, these bibs utilize stock mounts for easy installation. The edges are finished with braid. Decorative studs are plated brass, not steel, and will never rust. Conchos are custom, heavy die cast zinc, not a thin stamping, and are hand-tied with genuine leather straps.

## CLEANS, POLISHES, WAXES & TREATS

*Protect All™* is a do-it-all type of cleaner that cleans, polishes, waxes, treats and protects all surfaces. *Protect All's™* water repellent Carnauba Wax Formula provides durable protection against all elements. Simply spray, wipe, and polish dry for a beautiful, durable, lasting shine. Bugs, streaks, dirt, and dust are easily removed. *Protect All™* is non-abrasive so it is especially safe and effective. It also helps protect against damaging oxidation. *Protect All's™* anti-static property is ideal for treating vinyl to a clean, dry natural appearance. It leaves NO oily film to attract dust and dirt.

20107 - 6 oz. Aerosol, Each

20111 - 13.5 oz. Aerosol, Each

## PROTECT ALL™

**Protect All™** is recommended for all vinyl seats by Mustang Seats.

20113 - 16 oz. Trigger, Each

No Studs or Conchos

## A truly unique look in hard saddlebags!

Mustang's unique skirted lids feature braided edge trim, studs and conchos, as well as classic braided accents on the bags that evoke a nostalgic look. These flat-backed bags with recessed front corners for axle clearance are made of reinforced fiberglass and covered with our high quality expanded vinyl.

ACCESSORIES

Bags and lids feature a rubber seal to help make the bags ultra water resistant. The inside surface is lined with a durable felt-like material that is easy on the contents as well as the knuckles. Mustang Saddlebags are undrilled for a universal fit that will clear most exhaust systems. Mounting hardware is not included; see page 85. **Turn signal relocation may be required on some models.**

Saddlebags measure 26" L x 15" H x 9" W with a 21" x 9" opening. Overall capacity is 1,960 cubic inches (17 quarts each). Holds half-helmets.

Chrome Plated  
Hinges & Lockable  
Latches, Includes  
Two Keys

For Mounting Bracket  
info see page 85.

# Saddlebag Mounting Brackets

Mustang Hard Saddlebags are universal but we recommend using Easy Brackets, the innovative two-point lockable docking system that allows the quick and easy installation and removal of saddlebags.

To purchase Easy Brackets or for any technical information, visit [www.easybrackets.com](http://www.easybrackets.com) or call 866-521-3024.

## Rain Covers

ACCESSORIES

Keep your bike's seat protected and your own seat dry! Mustang's water repellent rain covers fit over all Mustang seats and most stock and aftermarket seats. These black nylon covers go on/off quickly plus conveniently fold up into their own integrated storage pouch with a drawstring. Pouch easily fits in your saddlebag. Choice of standard cover or cover to fit seats with a driver backrest.
